

User Instructions

VMax Adapter

For use with the i-Series Portable Dehumidifier

The VMax Adapter directs the warm, dry air produced by the i-Series dehumidifiers directly over the floor surface in a focused, laminar flow to help accelerate drying.

READ AND SAVE THESE INSTRUCTIONS

KEY FEATURES

- Rotomolded polyethylene construction – same durable material as the i-Series housing.
- Ridged mounting ring fits easily over i-Series outlet duct ring.
- Also works with the Sahara Snout Adapter Kit (F201).

SETTING UP THE VMax

1. Place the VMax on the floor in front of the i-Series outlet duct ring, as shown in Fig. A.
2. Slide the VMax over the ring until it rests snugly against the base of the duct mounting ring.

The VMax and i-Series unit are now ready for use.

MAINTENANCE

To maintain appearance, wipe interior and exterior surfaces with a damp cloth. For deep cleaning and a lasting, protective shine, use Dri-Eaz MicroGuard Cleaner and MicroGuard Protectant, available from your Dri-Eaz distributor.

WARRANTY

Warranty information is available from your dealer.

For more information about the VMax, contact your dealer or call Dri-Eaz Products at 800-932-3030.

FIG. A: OPERATING POSITION

Place VMax on the floor in front of the i-Series dehumidifier and slide into position over the duct ring.
