## Pool & Spa Maintenance

Indoor swimming pool and spa rooms are very unique in their maintenance demands. When pool water is heated to swimming temperatures, large amounts of moisture are released into the pool enclosure. This moisture is heavily laden with chlorine or bromine disinfectants, and it attacks everything it comes in contact with. If left uncontrolled, mold and mildew will eventually permeate every inch of a swimming pool facility, as well as any adjoining structures.

## The DCA Solution

DCA Pool Room Dehumidifiers are specifically engineered to control the damaging effects of pool room humidity. Removing excess moisture from the pool area preserves paint, prevents rust and protects light fixtures, furniture, hardware and your facilities structure.

DCA dehumidifiers are designed to be multifunctional systems that can provide pool room heating and cooling, as well as pool water heating without additional hardware expenses. The dehumidification process is entirely automatic and controlled by a wall mounted humidistat and thermostat.

## The Indoor Pool And Spa Problem

Mold and mildew cause blistering paint and rust formation on metal objects such as light fixtures, conduit, furniture, door knobs and hinges. Unchecked moisture also causes building insulation to lose its insulating ability. Wooden structures warp, rot and decay.

With over three decades of experience in building industrial dehumidification systems for indoor pool rooms, DCA has established itself as the industry quality and value leader.

## Industry Leading Engineering And Application Assistance

Our engineering department takes great pride in researching and integrating the latest proven refrigeration innovations, assuring industry leading energy operating and performance efficiencies.

Our friendly and competent application engineering staff's main goal is to assist in making your dehumidification project a success in every aspect.

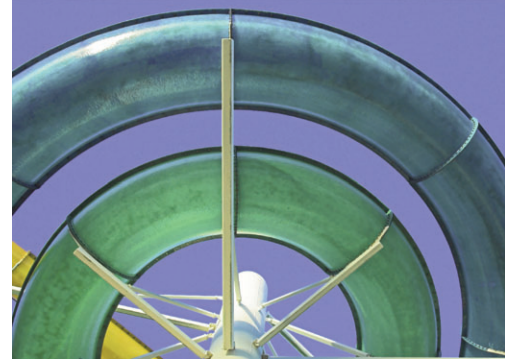

Our trained factory representative organization assures that wherever a need for dehumidification arises, a fully qualified DCA sales person is nearby to assist you.

## State-Of-The-Art Manufacturing

DCA's Wisconsin manufacturing facility embodies the latest refrigeration manufacturing practices and techniques. Our skilled craftsmen, many with over three decades of experience in the industry, make sure that each DCA dehumidifier is built to the highest of industry standards. Exhaustive quality control techniques assure that each unit performs to the highest expectations for many years.

## The Finest Warranty In The Industry

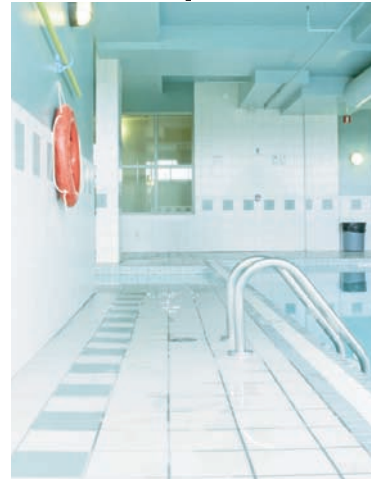

At DCA we offer a "No Quibble" 3-Year Parts Warranty on every dehumidifier and remote condenser we manufacture. No other dehumidifier manufacturer currently offers a warranty this comprehensive.
