

# User Instructions VMax Adapter

For use with the LGR 2800i Portable Dehumidifier

The VMax Adapter directs the warm, dry air produced by the LGR2800i directly over the floor surface in a focused, laminar flow to help accelerate drying.

## READ AND SAVE THESE INSTRUCTIONS

### KEY FEATURES

- Rotomolded polyethylene construction – same durable material as the LGR 2800i housing.
- Ridged mounting ring fits easily over 2800i outlet duct ring.

### SETTING UP THE VMax

1. Place the VMax on the floor in front of the LGR 2800i outlet duct ring, as shown in Fig. A.
2. Slide the VMax over the ring until it rests snugly against the base of the duct mounting ring.

The VMax and LGR2800i are now ready for use.

### MAINTENANCE

To maintain appearance, wipe interior and exterior surfaces with a damp cloth. For deep cleaning and a lasting, protective shine, use Dri-Eaz MicroGuard Cleaner and MicroGuard Protectant, available from your Dri-Eaz distributor.

### WARRANTY

Warranty information is available from your dealer.

For more information about the VMax, contact your dealer or call Dri-Eaz Products at 800-932-3030.

**FIG. A: OPERATING POSITION**

Place VMax on the floor in front of the LGR 2800i and slide into position over the duct ring.
