Effects of overexposure: Based on the available animal toxicity information, it is anticipated that this material will cause mild or no skin or eye irritation upon direct or prolonged contact. No human overexposure data is available for this material.			
Overexposure may aggravate existing conditions: No effects indicated.			

7. First Aid

Emergency and First Aid Procedures:
Eyes: Flush eyes with plenty of water for several minutes. Seek medical attention if irritation develops.
Skin: Wash affected areas with plenty of water and soap, if available, for several minutes. Seek medical attention if irritation develops.
Ingestion: If swallowed, give 3-4 glasses of milk (if unavailable, give water), but DO NOT induce vomiting. If vomiting does occur, give fluids again. Get medical attention to determine whether vomiting or evacuation of stomach is necessary. Do not give anything by mouth to an unconscious or convulsing person.
Inhalation: Remove from area to fresh air. Seek medical attention if respiratory irritation develops or if breathing becomes difficult.
