

AirMedic Pro 6 Series

Our guarantee: If you find another unit with more filtration at a lower cost, we give you back the difference plus a FREE personal unit (value of \$500)

Heavy-Duty Air Filtration for Contaminated Environments

The AirMedic Pro 6 series features a selection of heavy-duty air purifiers, ideal for large homes, businesses and industries.

With up to 39 pounds of activated carbon, these units feature the most filtration media available for chemical and odor adsorption, as well as a HEPA filtration system for airborne particles.

Choose from our AirMedic Pro 6 series for severely contaminated environments, areas with continuous sources of pollution or for the most complete protection available.

■ Customizable Features

Activated Carbon Blend

Exec Blend: Our Exec carbon is our general-purpose blend, ideal for trapping a wide range of airborne chemicals, gases and odors.

Vocarb Blend: Our Vocarb carbon is our boosted blend, offering a more aggressive removal of hard-to-trap airborne chemicals, gases and odors. This blend is best suited for newly renovated environments, unknown contaminants and/or formaldehyde.

Custom Blend: Have an unusual IAQ problem? Let us customize the perfect carbon blend solution!

Filter Depth

A unit's filter depth is key to its adsorption capacity. Customize your unit's with a carbon bed filter to maximize its chemical-adsorption efficiency:

3" (22-23 lbs. of carbon),
3.5" (27-29 lbs. of carbon), or
5" (38-40 lbs. of carbon).

Organic (Super) HEPA filter (no glue, no easy breakage).

■ Optional Features

Virus, Mold & Bacteria Protection

Customize your air purifier with a UV light to provide additional protection from viruses, mold and bacteria.

HVAC - Whole Home or Whole Space

Adapt your air purifier to duct into your central air heating and cooling systems, to provide an ideal filtration system for your whole home. Our HVAC units are identified with an "AH".

Source Capture

Prevent dangerous toxins from becoming airborne by trapping them at the source. Our source capture units are identified with a "W".

Our guarantee: If you find another unit with more filtration at a lower cost, we give you back the difference plus a FREE personal unit (value of \$500)
