APPENDIX

APPLICATION

The EIPL WM range of dehumidifiers are an ideal solution for humidity control in a wide variety of applications including offices, apartments, stores, restaurants, bars, salons, museums, storerooms, computer and telecommunications rooms, garages, cellars and animal enclosures. It’s also great for spa rooms in homes or hotels / motels.

KEY DESIGN FEATURES

- Cross-flow blower style fan for efficient, quite operation
- Status / Mode Indicators
- Removable, washable air filters
- High Capacity Integral condensate pump
- High efficiency rotary compressor (WM80)
- Robust Steel Construction
- Drainage facility from either end
- Low temperature operation
- Long power cord with molded plug
EIPL

The WM range of industrial and commercial dehumidifiers have been developed by EIPL, the internationally renowned experts in the field of dehumidification technology.

PROVEN PERFORMANCE

Whatever your drying requirements, EIP dehumidifiers have the answer. All units operate effectively across a broad range of temperatures and can provide low levels of relative humidity when required.

THE PROBLEM

Excess humidity in your warehouse, office, factory or shop results in corrosion, mold growth and rotting. Enormous costs are incurred every year through damage to inventory and through inflated building maintenance costs as a result of dampness. Even if your building seems dry during the day, at night when the temperature falls the humidity rises and the condensation process begins.
